**Description:**

Newest and the most versatile Axtel headset from the Voice series, distinctive by its modern design and production technology. Voice UC45 headset is ideal for office, remote work and education as well as listening to music. Key feature of the headset is its immaculate passive noise reduction which isolate the noises from the surrounding environment thanks to large (70mm) cushions covered with soft leatherette material. The most technologically advanced and versatile headset from Axtel's Unified Communication line is equipped with backlit USB pilot with Audio button allowing user to adjust acoustic parameters either for conversation or music. In this newest headset model, Axtel is introducing new solution which allows user to connect with devices either with USB plug or Jack 3,5mm. High production standards in the European Union, outstanding quality of used materials and durable construction provide great comfort of use and high resistance. Due to Plug&Play technology and compatibility with most devices and commonly used softphone applications (such us Skype for Business and 3CX*) the headset is very easy and intuitive to use.

*3CX requires drivers installation
